Office Action Summary	Application No. 10/572,809	Applicant(s) CHING, MICHAEL KEITH	
	Examiner David C. Reese	Art Unit 3677	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Status of Claims

- Claims 11-18 are pending.

Claim Rejections - 35 USC § 102

[1] The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(c) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

[2] Claims 11-18 are rejected under 35 U.S.C. 102(b) as anticipated by Wright, US-5,205,616, because the invention was patented or described in a printed publication in this or a foreign country, or in public use or on sale in this country more than one (1) year prior to the application for patent in the United States.

As for Claim 1, Wright discloses of an apparatus for preventing removal of, or tampering with, a construction fitting comprising:

two construction element engaging components (27,28);

a fastener (22) for connecting said two construction element engaging components to one another, said fastener comprising a bolt (22) extending between said two construction element

Art Unit: 3677

engaging components and a nut (32) for tightening on said bolt (22) rigidly connecting said two construction element engaging components with a gap therebetween;

a body portion (50) for at least partially covering said nut (32) for preventing access thereto by an unfastening tool, said body portion extending from said nut to a position alongside said bolt within said gap; and,

locking means (66) movable relative to said body portion (50) between a first position, wherein said apparatus is removable from said construction fitting, and a second position wherein said apparatus is prevented from being removed from said construction fitting, said locking means (66) extending, in said second position, from said body portion in a direction toward said bolt (22) with said gap.

Re: Claim 12, wherein said locking means (66) is movable within a bore (38) in said body portion (32).

Re: Claim 13, wherein said locking means (66) is a screw-threaded element.

Re: Claim 14, wherein said locking means (66) is a pin lockable to said body portion (32) in said second position.

Re: Claim 15, wherein said locking means (66) is accessible and movement is effected, via a shaped tool (80).

Re: Claim 16, wherein said locking means (66) and said shaped tool (80) have respective key and keyhole elements engagable for moving said locking means from said second position to said first position.

Art Unit: 3677

Re: Claim 17, wherein said body portion (32) surrounds, in use, substantially all otherwise exposed surfaces of said nut (32) of said construction fitting said body portion including a bore through which a free end of said bolt extends.

Re: Claim 18, wherein said body portion (32) and said locking means (66) are made of metal.
